

## SENIOR SOFTWARE ENGINEER & ARCHITECT

Full-Stack engineer and architect with over 11 years of experience seeking a remote role with an equally passionate team. Skilled in architecture, testing, design patterns, clean code, business, servant leadership, learning and growth, communication, psychology, and people.

Has worn many hats - full stack developer, team lead, architect, and manager. An observant and astute thinker with a people & business first mindset. Software Engineer or Manager Position.

---

### EXPERIENCE **SENIOR ENGINEER, ARCHITECT, & TECHNOLOGY DEPT. MANAGER**

Lion Energy 2021-2024

Worked in React, Node, Postgres, and AWS: IoT Core, Timestream, IAM, Cognito

- Hired, mentored, and occasionally dismissed 12 developers over 3 years.
- Engineer & Architect (UML/SysML) for MVP, V1, and V2 Lion Energy API/Web
- Directed & built Cybersecurity, Data, Web, API, and Mobile teams
- Implemented cybersecurity standard, unit/integration testing standards, release strategies, scrum process, and thousands of lines of tested code.

### **LEAD SENIOR ENGINEER / DEVOPS**

Lion Energy 2020-2021

Worked in PHP, Laravel, JS, Vue, Tailwind, React, and Netsuite (ERP), EC2, AWS

- Solo wrote portal & back end that processed over \$50M in orders annually.
- Solo managed all devOps, releases, unit testing, architecture, and development.
- Enhanced and maintained Netsuite integrations
- Interfaced with all stakeholders, C-suite, and 3rd party companies ensuring all requirements met and stakeholders satisfied.

### **SENIOR ENGINEER**

ReminderDental 2016-2020

Worked in PHP, C#, Laravel, JS, and Bootstrap, Local/Remote Linux Boxes

- Took the project from inception to servicing over 200K dental patients with reminder texts, calls, emails with social media integration for feedback.
- Wrote all QA for the company including integration and unit tests.
- Added and maintained cron workers, external facing API services, and migrations. Was Lead UI/UX.
- Communicated directly with high-profile clients and managed all ticket resolution

### **FULL STACK DEVELOPER**

Courseaver 2014-2016

Worked in PHP, Laravel, JS, Bootstrap, and jQuery

- Transitioned SaaS student test prep software from deprecated version to modern version (Laravel 4.2 to 7) while removing technical debt.
- Brought repo into Object Oriented Programming and mentored other devs.
